OUR BENEFITS

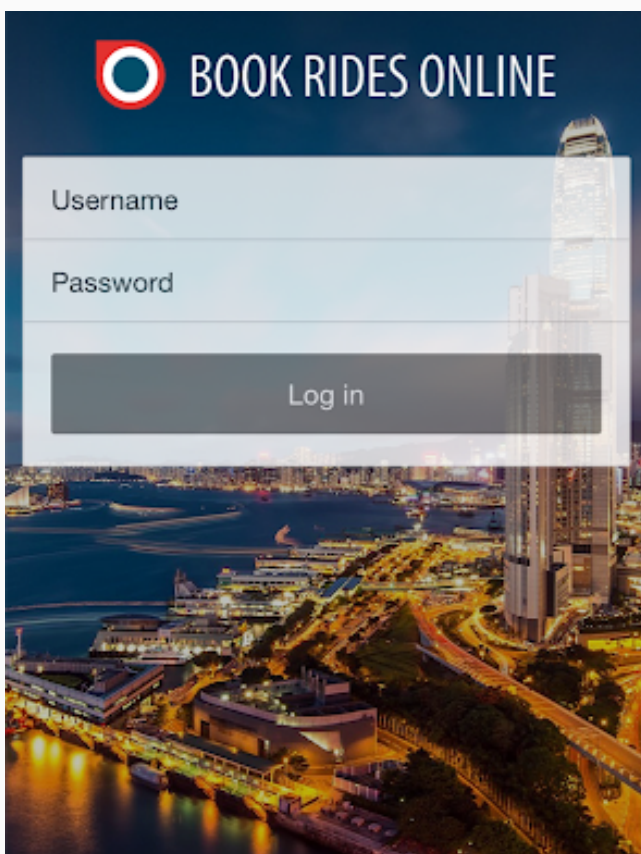

Centralised Business Account with Corporate Cars & Shuttles:

Your business can control and pay for your staff transfers from one central point and receive ONE centralised monthly invoicing or stored online credit within our online booking system.

When a business account is activated a password is sent to an account manager, allowing that person to create, modify (i.e. arrival or departure times changed, passengers added) or cancel a booking.

A company credit card is loaded into the Book rides online secure payment service and payments will be made through Stripe. The account manager can select the payment method and if direct debit or invoice are selected there are no bank fees. These methods of payment will save time and the worry of reimbursement for the traveller.

Book rides online creates an appointment, time set pick ups at a specified location, limiting the waiting for taxis or rental cars, and are always regarded as private exclusive bookings.

Book rides online App

If you or your staff are always on the go then all you need is the Book Rides Online app. Staff can simply downloading the "book rides online" app onto a business mobile and book their trip where ever and when ever they like.

Credit cards can be preloaded for payment through the business account so staff don't need to use their personal accounts.

Saving time on needing to claim back receipts both in time and finances.
